Summary:

Internet Phone Number Extractor is a very useful software developed to provide the users with a fast and accurate tool to extract Phone, Fax or Cell numbers from websites. Â The software can efficiently find phone numbers, Fax numbers or cell numbers either through search engines like Google, Yahoo etc. or through urls. This is an advance software with many innovative features. These features allows the user to Â find cell phone numbers, Fax numbers etc. as per the need, to find numbers from inner pages of the website, to search numbers from a list of websites, to filter while extracting numbers, to save the numbers in different file formats and many other functions.

Unique option of filtering while number extraction helps the user to get the list of numbers relevant to search criteria while leaving out non-relevant and unwanted numbers. The software allows the user to save the numbers in .CSV format which opens in MS Excel and .TXT format which opens in Notepad. The software can extract numbers from inner pages of the websites. The user has the option to make list of websites and search for numbers. Users can update search tags to get optimum results. The software works with different versions of Windows operating system like Windows XP/ Vista/ 2007/ 2008.

As virtually all business communication starts with a phone call now, softwares meant to extract phone numbers have become a necessity. In this scenario our Internet Phone number extractor software with its advance features is a must have for both big and small organizations.
